PERFECTING WATER

RAINWATER

HYBRID E™

Essential For Rainwater

The Hybrid E filtration system is a powerful all-in-one filtration unit designed to make your tank water safe for everyday use, even drinking! Reducing sediment, chemicals and bacteria, giving your family reliable and clean water from every tap.

Whether it's for drinking, bathing, or washing up, the Hybrid E improves taste, smell and safety, so you're not second-guessing what's in your water supply.

The integrated Radfire™ UV and filtration system means there's no need to buy separate components. With the reversible flow design and compact build, it's easy for a licensed plumber to install where it suits you, whether it be in the shed, pump house, or beside your rainwater tank.

The AMC architecturally mounted cover upgrade features a secure and tamper-proof casing, built to withstand the elements. This casing doesn't just keep your system secure, but also keeps it looking tidy, no matter where it's installed.

For extra peace of mind, the AMC models come with a 5 year warranty^ as standard.

For large houses with 2+ bathrooms.
Triple stage filtration and UV with 20 inch cartridges and wall mount structure.

HYBRID-E6 10 INCH UNIT

1st: Coarse Sediment Cartridge (washable)
2nd: Dual Purpose Sediment & Chlorine Cartridge
UV: Radfire™ UV Sterilisation

HYBRID-E7 20 INCH UNIT

1st: Coarse Sediment Cartridge (washable)
2nd: Dual Purpose Sediment & Chlorine Cartridge
UV: Radfire™ UV Sterilisation

HYBRID-E13 20 INCH UNIT

1st: Coarse Sediment Cartridge (washable)
2nd: Chlorine Taste & Odour Cartridge
3rd: Fine Sediment Cartridge
UV: Radfire™ UV Sterilisation

Features and Benefits

Why you should choose a Puretec Hybrid E Series for your home

Kills up to 99.99% of bacteria with Radfire™ UV technology, along with reducing sediment, viruses, and harmful microbes making the system essential for rainwater use.

Improves the colour of your water, along with taste and smell to experience reliable, safe water for drinking, cooking, and washing.

Available in two different wall mount models to suit your surrounding environment and the needs of your home.

The premium Hybrid E AMC model features a tough aluminium cover to protect against harsh weather conditions, a ToolNest for bowl spanner storage, and includes an extended 5 year warranty.

The standard Hybrid E includes a new straight edged wall mount structure, and is supported by an industry leading 3 year warranty.

Both AMC and standard models offer a range of cartridge configurations to suit the needs of residential homes.

Maintenance is hassle free, with quick cartridge changes and a built-in UV lamp timer and alarm to keep things running smoothly.

Supplied by a family owned company with 35 years of filtration experience.

What's Really in Your Rainwater?

Rainwater may seem clean, but once it lands on your roof, it can collect a range of harmful contaminants. Bird droppings, dead animals, bacteria, and even traces of pesticides or heavy metals from aging gutters can seep into your water.

Without proper filtration, these pollutants can end up in your tank and eventually in your glass. Filtering your rainwater is a simple yet vital step to protect your health and ensure your water is safe to drink, cook with, and bathe in.
