

Mains Water Filtration Product Guide

Puretec[®]
PERFECTING WATER

Filtration, providing great tasting, chlorine free^ water to your home.

While councils usually make every effort to supply safe mains or town water, there are often impurities remaining that can impact your health and the enjoyment of drinking water. Puretec has an extensive range of filters from undersink to whole house filtration which provides clean, fresh water to every tap in your house.

CHLORINE

Chlorine has an unpleasant taste that impacts the enjoyment of drinking water which can result in you drinking less than the daily recommended amount, leaving your skin and hair feeling dry.

BACTERIA

Bacteria can be present in mains water due to outbreaks of algae, E. Coli and other bacteria, which can cause significant health impacts. Bacteria can be easily removed^ with a UV filtration system.

SEDIMENT

Sediment such as dirt, sand, and rust can make its way into your water, potentially resulting in a build-up in your pipes & damage to your appliances, but can be easily prevented with a quality water filter.

WHOLE HOUSE

- 1 *FilterWall™ F Series Triple Stage Freestanding System*
- 2 *WH2 Series Dual Stage System*
- 3 *SOL Series Water Softener*

KITCHEN

- 4 *Z Series Undersink Filter Systems*

Whole House Filtration

Provides clean, great tasting water to every tap in your home.

Registered Design.

Registered Design.
Patent Pending.

HYBRID E13 AMC

Perfect for rain to mains switch over, experience improved taste, smell, colour, and odour with a three stage all-in-one filtration and UV system. Kills bacteria by up to 99.99% thanks to Radfire™ technology, along with reducing sediment, viruses and harmful microbes. Includes an aluminium protective cover to protect against harsh weather conditions, backed by a 5 year warranty^^.

Registered Design.

WH2 SERIES

The WH2 is a dual filter system designed to reduce sediment, chlorine, bad taste and odour from your mains water. The WH2 whole house filter is available in 1" & 1.5" connections and 30 to 60 Lpm models.

SOL 30/40 E3 WATER SOFTENER

The SOL Series has been designed for hard water applications to reduce calcium, limestone and other minerals that cause scale build-up in your pipes, appliances, and on your shower screen and glassware.

Registered Design.

FILTERWALL™ IM2

The FilterWall-IM2 is an Australian first, semi-recessed filtration system, combining the industry leading WH2-S5 filtration system with an in-wall weatherproof, lockable cabinet. Available in four colours.

Registered Design.

FILTERWALL™ F SERIES

3-stage filtration system designed to be installed along your fence or the side of your house, providing filtered water to every tap in your home. Available in two different sizes to meet the flow rate of your home, the FilterWall™ F is available in four core colours and six custom colours to match the palette of your home.

Undersink Filtration

Multi Stage Filters to fit directly to your existing mixer tap

PUREMIX Z6

The PureMix Z6 is a 0.1 micron* filter with a max flow rate of 9.5 Lpm. It not only reduces chlorine, sediment, bad taste and odour, but will also reduce harmful bacteria including E. Coli and Giardia.

PUREMIX Z7

The PureMix Z7 system is designed specifically for applications with higher sediment and harsher water quality such as rural supplies, areas with older pipe infrastructure and rainwater. With 4 levels of filtration, the PureMix Z7 filters sediment, rust and dirt down to 1 micron*.

PUREMIX Z2

The PureMix Z2 is designed for applications with limited undersink space, including bathrooms and kitchens. This 8 Lpm system filters sediment, chlorine, bad taste and odour down to 1 micron*.

Z1 Tripla™ Elite Tap and Filter Kit

Combine a stylish 3-way mixer tap with a Z1-R, industry leading multi-stage 0.1 micron* filter, which ensures that your filtered water is separate while not impacting the flow rate of your hot and cold water.

1 Choose your mixer tap

ELITE - 10 SERIES

Gooseneck, 100% Stainless Steel

ELITE - 20 SERIES

Straight Neck, 100% Stainless Steel

Available in 5 different colours and finishes.

Z18

The Z18 combines a stylish filter tap with a Z1 undersink filter, providing 5.5 Lpm of clean, fresh water. The Z1 utilises Ultra Z technology to reduce chlorine, sediment and bacteria, including E. coli down to 0.1 micron*.

RO270

The RO270, Reverse Osmosis tap and filter system, provides 270L/day of high purity water. The ultra-fine membrane rejects 98% of all dissolved impurities including heavy metals, salts, bacteria, fluoride & chlorine, to 0.0005 micron*.

TS200

The TS200, combines a high loop designer faucet with a twin undersink 0.5 micron* filter to provide clear, chlorine-free* water to your home. The 4 Lpm system ensures that filtered water is kept entirely separate from unfiltered water.

2 Install your filter system

Z1-R

The Z1-R is a 5 Lpm, 0.1 micron* filter that will reduce chlorine, sediment and bacteria, including E. coli and Giardia. The perfect partner for a stylish 3-way mixer tap.
